

Database Performance Monitor

Open-Source and NoSQL Database Performance Monitoring

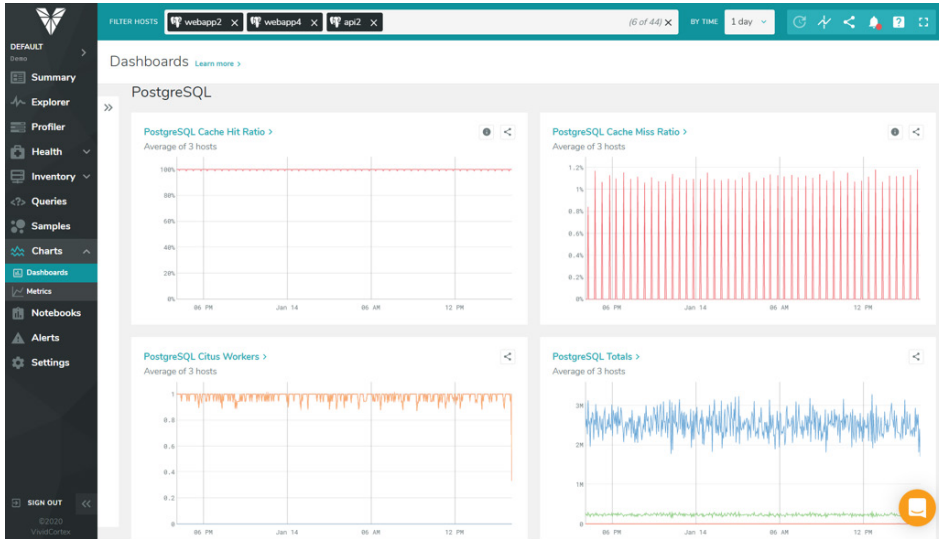

SolarWinds® Database Performance Monitor combines the simplicity of a SaaS-based database performance monitoring solution with big data analytics to visualize the health, performance, and availability of open-source and NoSQL databases.

FEATURES

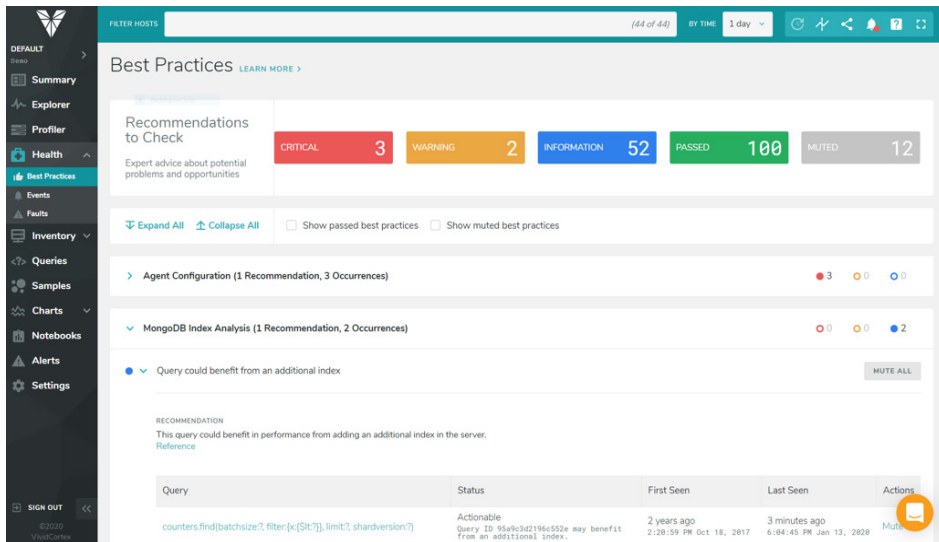

- 24/7 down-to-the-second monitoring, for both real-time and historical analysis
- Compare queries, databases, and more with custom side-by-side views
- Comprehensive database performance analytics include query samples and explain plans
- Weekly and daily summary reports and customizable alerts
- Unified view of all your database types and servers to understand your system
- Meaningful summaries show you the top 5 queries, application overview, and events
- Adaptive Fault Detection indicates when and where a system is failing

Customizable dashboards provide the flexibility to visualize the metrics that matter.

Go beyond monitoring with expert advice to proactively tune your database

KEY BENEFITS

- Visualize thousands of collected metrics with simple-to-create and -share charts
- Cross-functional team workflow is facilitated with notebooks to create and share knowledge
- Optimize resources and reduce database incidents with 1-second resolution into workloads
- Ship better code
 - See query response before and after a deployment event
 - Examine query details and performance including samples and execution plans
 - Compare the performance of your top queries over time
- Troubleshoot and diagnose outages
 - Correlate query response or behavior to system metrics to understand impacts
 - Isolate unusual behavior and potential contributing factors within the database

DETAILS

- Broad Database Support
 - PostgreSQL
 - MongoDB
 - MySQL
 - Redis
 - Aurora
- Support for physical, virtual, and cloud-based databases including AWS RDS
- Architecture
 - Secure, cloud-hosted platform
 - In-flight and at-rest encryption
 - Role Based Access Control, Single Sign-On, and SAML integration
 - Configurable option to filter customer sensitive data
 - Built on the International ISO/IEC 27000 family of standards
 - GDPR compliant along with SOC 2 Type II certification
 - Alerting and integration module allows for injection warnings to be transmitted directly to email, Slack, Victorops, or any number of messaging systems

ABOUT SOLARWINDS

SolarWinds (NYSE:SWI) is a leading provider of powerful and affordable IT infrastructure management software. Our products give organizations worldwide, regardless of type, size, or IT infrastructure complexity, the power to monitor and manage the performance of their IT environments, whether on-prem, in the cloud, or in hybrid models. We continuously engage with all types of technology professionals—IT operations professionals, DevOps professionals, and managed service providers (MSPs)—to understand the challenges they face maintaining high-performing and highly available IT infrastructures. The insights we gain from engaging with them, in places like our **THWACK** online community, allow us to build products that solve well-understood IT management challenges in ways that technology professionals want them solved. This focus on the user and commitment to excellence in end-to-end hybrid IT performance management has established SolarWinds as a worldwide leader in network management software and MSP solutions.
